Reasons for Allowance

Claim 1, as amended on 8/4/06, contains the limitation:

“a hardware protected region storing a portion of a computer basic input/output system comprising: a first uncompressed computer program operative to uncompress the compressed computer program”

The closest available art disclosed by Wang in figure 1 and 2 discloses a decompress module which decompresses part of a BIOS program as claimed in claim 1. However, Yang does not suggest placing decompress module 16 under hardware write protection. Boot block 12 contains elements that may be write protected (§ 18: boot block 12 may be hardware protected). Since Wang does not explicitly state that it would be obvious to write protect the decompress module or place it in boot block 12, one of ordinary skill in the art at the time of invention would not be motivated to write protect decompress module 16.

Independent claims 6 and 14 also claim the same limitation and are found allowable for the same reasons as claim 1.
